# **Terminal Services**

## I. Giới thiệu:

- Terminal Service Remote Application là một tính năng mới trên Windows Server 2008. Các chương trình ứng dụng sẽ được cài đặt sẵn trên Windows Server 2008, các máy trạm tuy không cài đặt chương trình ứng dụng, nhưng vẫn có thể khai thác các chương trình ứng dụng đó trên máy chủ thông qua Terminal Service.

## 1. Đặc điểm:

- Các máy trạm không cần phải có cấu hình phần cứng mạnh và doanh nghiệp không phải tốn nhiều chi phí về bản quyền phần mềm khi sử dụng dịch vụ này. Tuy nhiên, doanh nghiệp vẫn phải mất chi phí bản quyền cho CAL (Client Access License), và chi phí này vẫn thấp, có thể chấp nhận được

 Máy trạm kết nối đến máy chủ thông qua Terminal Service nên máy trạm phải được cài đặt Remote Desktop Connection (RDC) 6.0 trở lên. Có thể download RDC 6.0 cho Windows 2003 SP1 và Windows XP Professional SP2 tại <u>http://support.microsoft.com/default.aspx/kb/925876</u>.

## 2. Các hình thức máy trạm kết nối đến máy chủ:

- Có 4 cách để máy trạm kết nối đến máy chủ khi khai thác chương trình ứng dụng trên máy chủ:

- Sử dụng trình duyệt web: Máy chủ phải cài đặt thêm Terminal Service Web Access, máy trạm phải được cài đặt Remote Desktop Connection (RDC) 6.1. RDC6.1 có sẵn trong Windows Vista Service Pack 1 và Windows XP Professional Service Pack 3.
- Sử dụng Network Access: Máy chủ tạo sẵn file .rdp (mỗi chương trình ứng dụng tương ứng 1 file .rdp) và được share trên máy chủ, máy trạm truy cập vào máy chủ, chạy trực tiếp file đó để khai thác chương trình ứng dụng trên máy chủ.
- Sử dụng Network Access: Máy chủ tạo sẵn file .msi (mỗi chương trình ứng dụng tương ứng 1 file .msi)và được share trên máy chủ, máy trạm truy cập vào máy chủ, chạy trực tiếp file đó để cài đặt các shortcut liên kết đến chương trình ứng dụng trên máy chủ. Các shortcut này được cài đặt trong Start menu của máy trạm, cụ thể là mục Remote Application. Máy trạm chạy các shortcut đó để khai thác chương trình ứng dụng trên máy chủ.
- Sử dụng policy (áp dụng cho môi trường Domain) để triển khai hàng loạt việc cài đặt shortcut liên kết đến chương trình ứng dụng trên máy chủ cho nhiều máy trạm.

## II. Chuẩn bị: Hệ thống gồm:

- Server: Windows Server 2008
  - + Tạo local user: sv1/123, sv2/123 và add vào group remote desktop users
  - + Bật chế độ remote desktop trên máy server.
  - + Change password Adminstrator là 123
- Client: Windows XP.

## III. Thực hiện:

## 1. Cài đặt Terminal Services:

- Start→Programs→Administrative Tools→Server Manager. Chuột phải Roles→Add Roles.

- Before you begin→Next

Add toles Wizard Before You	Begin Soli
Before You Begin Server Roles Confirmation Progress Results	<ul> <li>This wizard helps you install roles on this server. You determine which roles to inst based on the tasks you want this server to perform, such as sharing documents or hosting a Web site.</li> <li>Before you continue, verify that: <ul> <li>The Administrator account has a strong password</li> <li>Network settings, such as state IP addresses, are configured</li> <li>The latest security updates from Windows Update are installed</li> </ul> </li> <li>If you have to complete any of the preceding steps, cancel the wizard, complete the steps, and then run the wizard again.</li> <li>To continue, click Next.</li> </ul>
